

WHY CHOOSE AN EXTREME DUTY MULTI VAC INDUSTRIAL VACUUM SYSTEM?

Meet the most USER FRIENDLY vacuum on the market today. The MULTI-VAC team has produced hundreds of machines over the last twenty years. As a result we have learned what the CUSTOMER expects in an industrial vacuum.

EASY SET-UP: Multi-Vac comes equipped with dual hose inlets, one on the left and one on the right sides of the machine, No turning the machine around to orient the hose. Each inlet has a replaceable abrasion resistant deflector plate.

LARGE CAPACITY: Multi-Vac Millennium series comes standard with a 1500 Litre fork lift truck portable hopper. This results in fewer dumping cycles, less contact with product and less demand for the fork lift truck.

LESS DOWN TIME: Multi-Vac's "NO TOOLS REQUIRED" filter bag and cage removal or replacement is by far the simplest and quickest system on the market. A bag and cage change can be made in less than 45 minutes. The bag house cover is hinged and has quick opening clamps. This compares with some of the competition's bolted covers with numerous nuts and washers to remove for access. Once the Multi-Vac bag house cover is open the cage and filters can be removed by hand. No bolted retaining rings to remove. Multi-Vac's filter bags can be removed from the clean air side of the bag house. The spent bags may be pushed down through the tube sheet into the hopper. The person changing the bags does not come in contact with the dirty bags, which is important in properly handling toxic materials.

SIMPLICITY: Multi-Vac has no internal ledges or baffles to trap material. This is important when handling different materials to prevent cross contamination of toxic materials. Multi-Vac's philosophy of simple design means easy operation and minimal servicing. Easy to use control panel.

SUPPLYING EXTREME DUTY INDUSTRIAL VACUUMS FOR INDUSTRY SINCE 1990

Filter Cover Houses Complete Reverse pulse jet filter cleaning system with timer board and diaphragm valves

Photohelic for "On Demand" automatic filter cleaning. Differential Controller

Lifting lugs all 4 corners

Large vacuum gauge

Dry level probe automatically shuts off vacuum when hopper is full. Triggering pilot light on panel.
OPTIONAL WET LEVEL PROB AVAILABLE

Fork lift truck portability **FROM EITHER SIDE**

700 Litre self dumping hopper standard **OPTIONAL 1500 LITRE AVAILABLE**

Air lift hand valve to raise and lower machine to remove hopper

Fused Disconnect

Positive Displacement Vacuum Pump

Controls and Pilot Lights

Discharge Silencer Inside Vacuum Pump/Motor

Guard cam roller guide lifting system

Dual Inlets (one each side) with 4" Female Quick Couplings

Quick disconnect air connection

For more info call
1300 333 ACS

Typical Mini Series 3000

SUPPLYING EXTREME DUTY INDUSTRIAL VACUUMS FOR INDUSTRY SINCE 1990

Filter Cover Houses Complete

Reverse pulse jet filter cleaning system with timer board and diaphragm valves

Filter cover locking system with clevis pin and gas assist cylinder to open cover

Discharge silencer inside vacuum pump/motor "Power Pack"

700 Litre self dumping hopper standard
OPTIONAL 1500 LITRE AVAILABLE

Lifting lugs all 4 corners

"No Tools Required" Filter change couplings

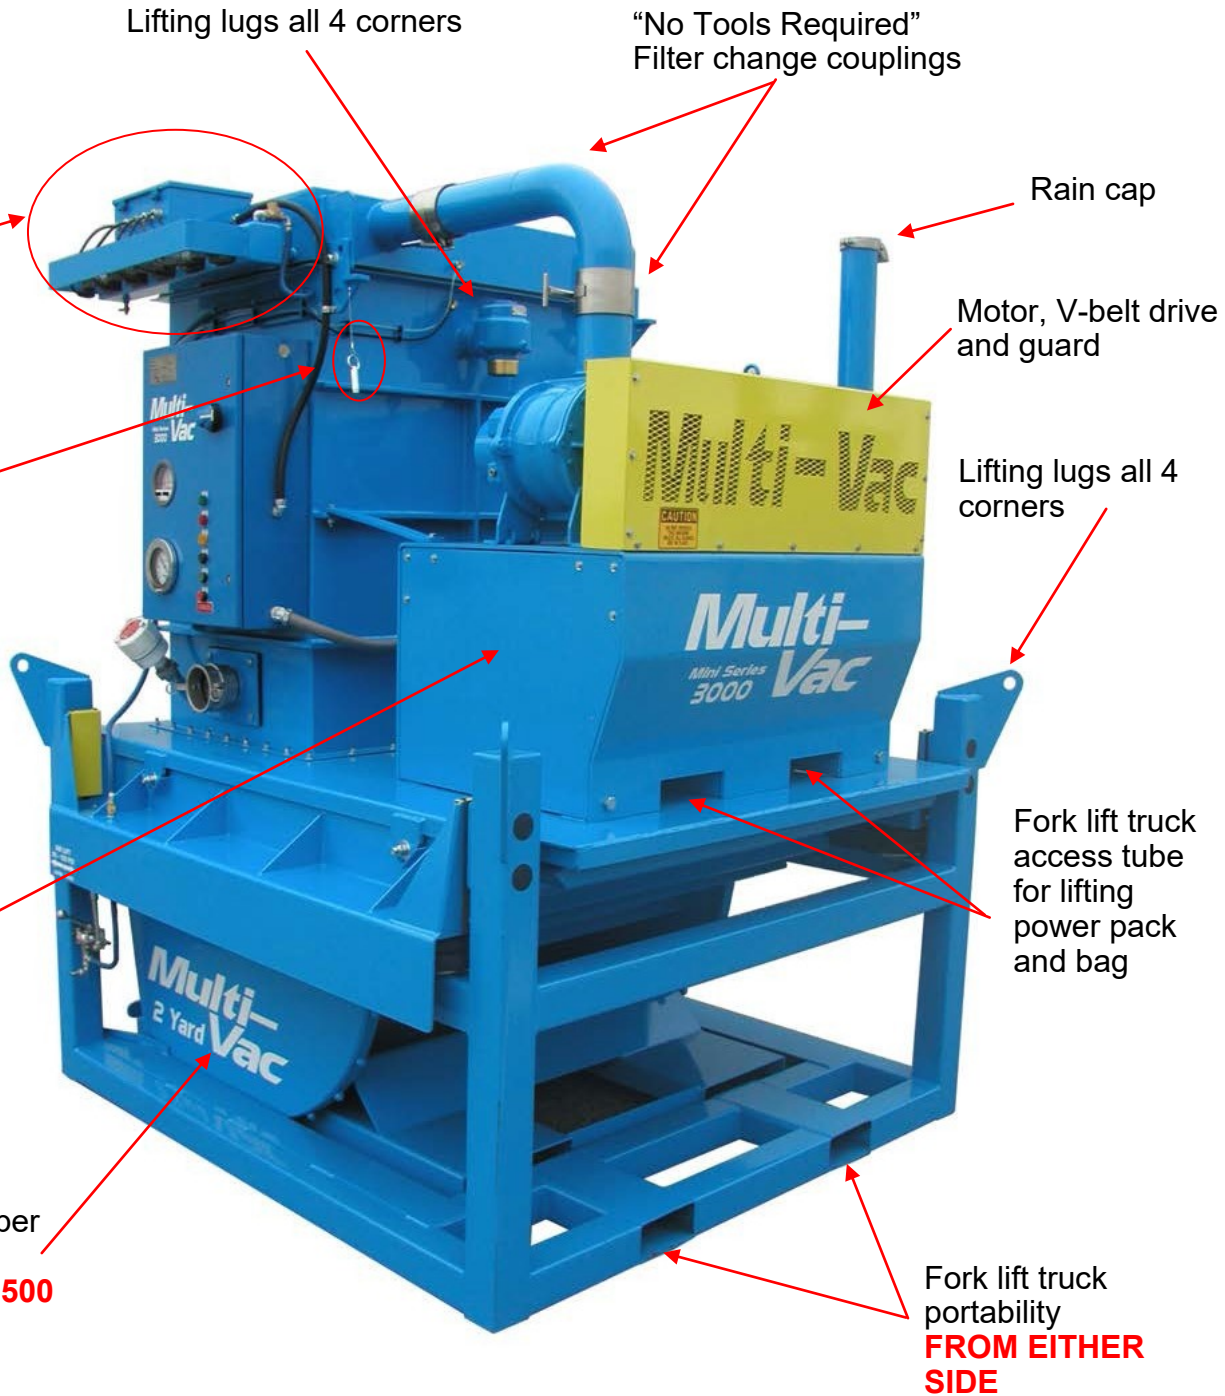

Rain cap

Motor, V-belt drive and guard

Lifting lugs all 4 corners

Fork lift truck access tube for lifting power pack and bag

Fork lift truck portability **FROM EITHER SIDE**

For more info call
1300 333 ACS

Typical Mini Series 3000

SUPPLYING EXTREME DUTY INDUSTRIAL VACUUMS FOR INDUSTRY SINCE 1990

Fuse disconnect switch

Multi-Vac

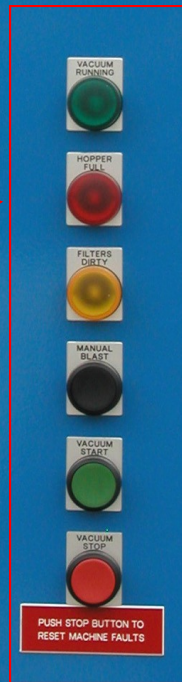

Mini Series 3000

Adjustable photohelic differential pressure settings and gauge
Keeps bags clean automatically

Illuminated pilot lights

Large vacuum gauge

For more info call
1300 333 ACS

Typical Mini Series 3000 Control Panel

Gas Cylinder

Provides lift assist for bag house cover

“No Tools Required”

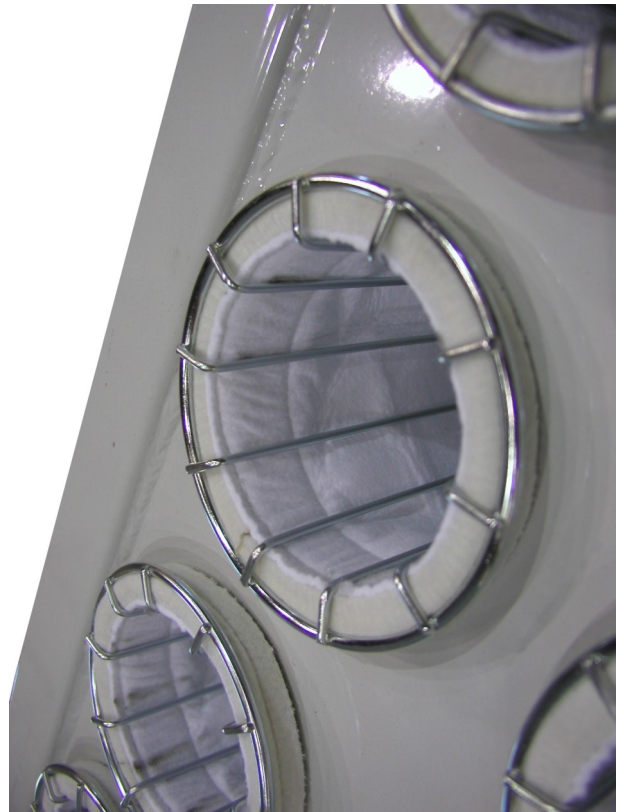

Stainless steel, vacuum steel couplings makes bag change-out fast and easy

WIDE VARIETY OF FILTER BAGS AVAILABLE TO SUIT YOUR NEEDS

- Single finish polyester
- Teflon coated
- Nomex

Special purpose filter bags

- Singled finish polyester with copper ground wire
- Teflon coated with copper ground wire
- Micro felt
- PTFE membrane

Replaceable bag cage
